Southern Cascades Interagency Incident Management Team
Incident Commander, Jerry Van Dyne Incident Commander Trainee, Eric Risdal

October 10, 2018 - 9:00 A.M.

Public Information Phone: (541) 822-8216 Available 8:00 am to 7:00 pm

Special Announcements:

The public is asked to respect the road and area closures for protection to themselves and firefighters. Please refrain from entering the closed areas.

The Terwilliger Fire Area Closure implemented August 30th, 2018 by the Willamette National Forest remains in place. The Closure Area is being patrolled and enforced. It is entirely within Lane County Oregon and does not impact Oregon State Highway 126. Public and firefighter safety remains the priority.

Forest Service Road (FR) 19 and Terwilliger Hot Springs (also known as Cougar Hot Springs) are within the Terwilliger Area Closure. They remain closed due to unsafe conditions from gravity fall hazards, including rocks, debris and fire-weakened trees. The closure begins at the junction of FR 410 and continues south to Box Canyon. Members of the public should expect these closures to remain in effect for an extended period.

The Oregon Department of Forestry (ODF) and the McKenzie River Ranger District, Willamette National Forest, jointly responded to the report of the Terwilliger Fire with both aircraft and firefighter resources. Although the fire did not burn on to ODF-protected lands, the agency has stayed involved with suppression actions and planning. Follow ODF on Facebook [@oregondepartmentofforestry](https://www.facebook.com/oregondepartmentofforestry) - or at [blogspot.com](http://wildfireoregondeptofforestry.blogspot.com) <http://wildfireoregondeptofforestry.blogspot.com>

Acreage: Estimated 11,555 **Completion:** 80% **Cause:** The fire is currently under investigation.

Resources: Total: 101: 1 type 2 IA hand crews, 1 light-lift helicopter, 4 engines, 1 water tender, 1 ambulance, and 16 heavy equipment. Additional contract resources are currently being utilized to facilitate much of the repair and mitigation work, including brushing and chipping operations.

Current Fire Information: Crews continue with mop-up operations along the western edge of the fire, with minimal smoke lingering under current weather conditions.

A Burned Area Emergency Response (BAER) team has begun work assessing the severity of damage across the fire area. The BAER team operates cooperatively with fire incident command and district personnel.

Felling teams continue to work on hazard tree mitigation and removal. Crews are removing fire-weakened trees along hillsides and debris from roads. Heavy equipment, graders, and trucks continue to work and travel along the 19 road.

Weather: Wednesday's forecast is for partly cloudy in the early morning, sunny and warming by noon. High temperatures could reach 61 degrees during the day. Humidity is expected to drop substantially to 47%. Winds are predicted to shift to the east, then north east with speeds of 5-7 mph, bringing some drying conditions.

Closures: Terwilliger Area Closure Order # 06-18-01-18-19 may be viewed at <http://go.usa.gov/xRnz7>
